Frequently Asked Questions (FAQ)

Q1: What are the essential tools needed for basic automotive maintenance?

A1: Basic automotive maintenance requires a set of hand tools, including wrenches (metric and standard), sockets, screwdrivers (Phillips and flathead), pliers, a jack and jack stands, and a wheel chock. More specialized tools may be needed depending on the specific task. A good quality owner's manual for your specific vehicle is also essential.

Q2: How often should I change my vehicle's oil?

A2: Oil change frequency depends on the type of oil used (conventional, synthetic), your vehicle's manufacturer recommendations, and your driving habits. Consult your owner's manual for the recommended oil change interval. Generally, conventional oil may need changing every 3,000-5,000 miles, while synthetic oil can often go longer.

Q3: What are the signs of a failing alternator?
